

What do I want to learn or understand better?

As we have now completed our final sprint, I still felt that I am far from fluent in SCRUM. In the future, I hope to learn more about SCRUM and other agile project management frameworks.

How can I help someone else, or the entire team, to learn something new?

I have read up on the A, B A→B reflection process and have helped my team members get started on writing our final report.

What is my contribution towards the team's use of Scrum?

I helped generate user stories and, more importantly, pushed for a strict deadline and definition of done for our project so that we can now begin work on the final report.

What is my contribution towards the team's deliveries?

I have continued work on the final report and written ReadMe's for both Git repositories. Also, I assisted in structuring the team reflection due this sprint and continued writing out documentation.
