What do I want to learn or understand better?

As we now reach our final sprint, our main focus will be fixing bugs, documentation and creating installation instructions. We will be using DartDoc, which I have started to read up on. Consequently, I hope to become fluent in DartDoc in the next sprint.

How can I help someone else, or the entire team, to learn something new?

I have laid the groundwork for documentation using DartDoc, and as such I will help my team mates getting it working in this last sprint.

What is my contribution towards the team's use of Scrum?

Once again, I organised our planning poker session and made sure every task for this sprint received a fair amount of story points. Also, we split some user stories in order to get more "vertical cake slices".

What is my contribution towards the team's deliveries?

I have started work on our final report and implemented a did the last work on our booking-sharing feature in the application. Also, I assisted in writing the team reflection due this sprint and began writing out documentation.
